

Claims

1. A cosmetic and/or dermatological body cleaning preparation with a reduced tendency toward damaging skin-intrinsic enzymes, comprising a surfactant system of
 - (1) alkyl ether sulfate,
 - (2) alkylamidopropylbetaine,
 - (3) a further surfactant chosen from the group consisting of alkyl polyglucosides, ethoxylated triglycerides and salts of citric acid alkyl polyglycol esters.
- 10 2. The use of surfactant systems of
 - (1) alkyl ether sulfate,
 - (2) alkylamidopropylbetaine,
 - (3) a further surfactant chosen from the group consisting of alkyl polyglucosides, ethoxylated triglycerides and salts of citric acid alkyl polyglycol ester sulfo-
- 15 succinates for reducing skin-intrinsic enzyme damage when cleaning the body or hair.
3. The preparation or the use as claimed in one of the preceding claims, characterized in that the content of further surfactant (3) is greater than 1% by weight, preferably greater than 1.5% by weight.
- 20 4. The preparation or the use as claimed in one of the preceding claims, characterized in that the ratio of alkyl ether sulfate to further surfactant is 10:0.5 to 10:5, particularly preferably 10:1 to 10:3 and very particularly preferably 10:1.8 to 10:2.2.
- 25 5. The preparation or the use as claimed in one of the preceding claims, characterized in that Na cocoyl glutamate is additionally present.
- 30 6. The preparation or the use as claimed in one of the preceding claims, characterized in that the surfactant (3) chosen is PEG-7 glyceryl cocoate, disodium PEG-5 lauryl citrate sulfosuccinate or lauryl glucoside.
